## Introduction

This booklet has been designed so that you can use it with your child to help them revise for practice their mathematics and numeracy skills at Curriculum for Excellence level 2.

The booklet is not an exhaustive list of the contents - this booklet does summarise the majority of key facts and methods which your child should be familiar.
Key skills developed by learner in mathematics are:

- Interpreting questions
- Communicating processes and solutions
- Justifying choice of strategies
- Linking concepts
- Using proper mathematical vocabulary
- Mental agility
- Algebraic reasoning
- Determining the reasonableness of solutions

## How to use this booklet

You can use this booklet to test your child's understanding of concepts. Basically, all you have to do is read out the question on the left-hand column of the page and they should be able to give the correct response which is shown in the right-hand column.

Don't worry if you are unsure of the topic as it is useful for your child to be able to explain what their understanding is and to describe their preferred method. This helps them to get a better grasp of their knowledge.

Thank you in advance for your help and good luck!

## Topics

Estimation and Rounding Number and Number Processes
Multiples, factors and primes
Fractions, Decimal fractions and percentages Money
Time
Measurement
Patterns and Relationships
Expressions and Equations
Properties of 2D and 3D shapes
Angle
Symmetry
Data and Analysis
Probability and chance

## Estimation and Rounding

| Question | Answer |
| :--- | :--- |
| How do you round? | If the next digit is 5 or more <br> round up. |
| Round 56 to nearest 10 | 60 |
| Round 750 to nearest 100 | 800 |
| Round 7892 to nearest 1000 | 8000 |
| Round 1•72 to 1 decimal place | $1 \cdot 7$ |
| Estimate the answer to $23 \times 57$ | Close to $20 \times 60=1200$ |

## Number and Number Process

| Question | Answer |
| :--- | :--- |
| When you multiply by 10 what <br> happens to each digit? | Each digit moves 1 column to the <br> left |
| When you divide by 100 what <br> happens to each digit? | Each digit moves 2 columns to the <br> right |
| What is $0 \cdot 73 \times 10 ?$ | $0 \cdot 73$ |
| What is $4 \cdot 57 \div 100 ?$ | $0 \cdot 0457$ |
| What is $23 \times 4$ | $20 \times 4=80$ <br> $3 \times 4=12$ <br> Add together to make 92 |
| Try writing down this calculation. <br> What is $43 \div 5 ?$ | $8 \cdot 6$ |
| What word do you use for the <br> order of calculations? | Brackets, Operations, Divide <br> Multiply, Add, Subtract |
| What is $5+3 \times 4 ?$ | $5+12=17$ |
| What are the numbers below zero <br> called? | Negative numbers (integers) |
|  | -3 |

## Multiples, Factors and Primes

| Question | Answer |
| :--- | :--- |
| What is a multiple? | A number that may be divided by <br> another number without a <br> remainder |
| What are the multiples of 4? | $4,8,12, \ldots$. |
| What is a factor? | A number that may be divides into <br> another number without a <br> remainder |
| What are the factors of 18 | $1,2,3,6,9,18$ |
| What is a prime number? | A number with only 2 factors itself <br> and 1 |
| Is 7 a prime number? | Yes, because only $1 \times 7=7$ |

Fractions, Decimal Fractions and Percentages

| Question | Answer |
| :--- | :--- |
| How do you find half of a number? | Divide the number by 2 |
| How do you find a third of a <br> number? | Divide the number by 3 |
| How do you find two-thirds of a <br> number? | Divide the number by 3 then <br> multiply your answer by 2 |
| What is a simpler fraction than $\frac{3}{6} ?$ | $\frac{1}{2}$ |
| What is fraction is greater $\frac{1}{2}$ or $\frac{2}{3} ?$ | $\frac{1}{2}=\frac{3}{6} \quad$ and $\frac{2}{3}=\frac{4}{6} \quad$ so $\frac{2}{3}$ is |
| What fraction is the same as $50 \% ?$ | $\frac{1}{2}$ |
| What fraction is the same as $25 \% ?$ | $\frac{1}{4}$ |
| What fraction is the same as $10 \% ?$ | $\frac{1}{10}$ |
| What decimal is the same as $50 \% ? ~$ | 0.5 |

| Question | Answer |
| :--- | :--- |
| What decimal is the same as 25\%? | $0 \cdot 25$ |
| What decimal is the same as 10\%? | $0 \cdot 1$ |
| What is $50 \%$ of $£ 12 ?$ | $\frac{1}{2}$ of $£ 12=£ 6$ |
| What is $10 \%$ of $£ 12 ?$ | $£ 12 \div 10=£ 1 \cdot 20$ |
| How could you work out $15 \% ?$ | Work out $10 \%$ then $5 \%$ and add |
| them together |  |
| What fraction is the same as <br> $0 \cdot 5 \% ?$ | $\frac{1}{2}$ |
| What fraction is the same as <br> $0 \cdot 25 \% ?$ | $\frac{1}{4}$ |
| What fraction is the same as $0 \cdot 1 \% ?$ | $\frac{1}{10}$ |
| If you have a cake and eat <br> $\frac{1}{4}$ <br> In a sale, you save $15 \%$. What <br> percentage do you pay? | $100 \%-15 \%=85 \%$ |
|  | $1-\frac{1}{4}=\frac{3}{4}$ |

| Question | Answer |
| :--- | :--- |
| What percentage of <br> the pie chart is <br> coloured? |  |

## Money

| Question | Answer |
| :--- | :--- |
| What coins do we use in Britain? | $1 p, 2 p, 5 p, 10 p, 20 p, 50 p, £ 1$ and $£ 2$ <br> coins |
| What coins would you use to make <br> $77 p$ | $50 p, 20 p, 5 p$ and 2p |
| You can buy 100 g of cereal for <br> $£ 2.50$ or 200 g for $£ 4$. Which is <br> best buy? | 200 g box |
| What is $£ 1$ shared between 4 <br> people? | $25 p$ |
| What is $£ 1 \cdot 80$ plus $34 p$ <br> A banana cost $34 p$ how much would <br> 3 bananas cost? <br> John bought a computer game for <br> $£ 40$ and traded it in for $£ 14$. How <br> much of a loss did he make?$40-14$ <br> $=£ 26$ |  |

| Question | Answer |
| :--- | :--- |
| If you make cups for 25p and want <br> to sell them to make a 15p profit. <br> How much should you sell them for? | $25+15=40 p$ |
| What is the machine called which <br> you use to take out cash? | ATM (automatic teller machine) |
| What card do you use if you buy <br> things and pay later? | Credit card |

Time

| Question | Answer |
| :--- | :--- |
| What type of clock has hands <br> which move? | Analogue |
| How do you change 24 hour time to <br> 12 hour time? | If the time is less than 12 it is am. <br> If the time is more than 12, take <br> away 12 and add pm |
| What is 5 am in 24 hour time? | 0500 |
| What is 5 pm in 24 hour time? | 1700 |
| What time is noon? | 12 pm or 1200 |
| What time is 0000 | 12 am or midnight |

| Question | Answer |
| :--- | :--- |
| How many minutes is $\frac{1}{4}$ of an hour? | 15 minutes |
| How many days are in each month? | 30days - April, June, September, <br> November <br> $28 / 29$ days - February <br> 31 days - all others |
| How many hours/minutes is it <br> between 9:30am and 11:00am? | 1 hour and 30 minutes |
| What time is it 12 minutes after <br> $8: 50$ am | $9: 02$ am |
| What time units would you use for <br> a race? | Seconds |
| How long is a decade? | 10 years |
| How long is century? | 100 years |
| A car can travel 200 miles in 4 <br> hours. How far did it travel in 1 <br> hour? | $200 \div 4=50$ miles |
| A train can travel at 70 miles per <br> hour. How far can it travel in 3 <br> hours? | $70 \times 3=210$ miles |

## Measurement

| Question | Answer |
| :--- | :--- |
| What units would you use to <br> measure distance? | Millimetres, centimetres, metres, <br> kilometres |
| What units would you use to <br> measure volume of liquids? | Millilitres, litres |
| What units would you use to <br> measure weight? | Grams, kilogrammes, tonnes |
| What is the perimeter of a shape? | The distance around the outside |
| What is the area of a shape? | The space in the inside of a flat <br> shape |
| How many millimetres are make 1 <br> centimetre? | 10 millimetre $=1$ centimetre |
| Change 24 mm into centimetres | $24 \div 10=2.4$ cm |
| How many grams make 1 kilogram? | 1 kilogram = 1000 grams |
| How do you convert kilograms into <br> grams? | Multiply by 1000 <br> 4.4 kilograms into grams <br> $1000=3400$ grams |

| Question | Answer |
| :--- | :--- |
| How many millilitres make a litre? | $1000 \mathrm{ml}=1$ litre |
| How do you convert litres into <br> millilitres? | Multiply by 1000 |
| Change 800 ml into litres. | $800 \div 1000=0 \cdot 8$ litres |
| Which is smaller? <br> 7 millimetres or 0.6 centimetres? | 0.6 centimetres |
| How do you calculate the area of a <br> rectangle? | Multiply the length by the breadth |
| How do you calculate the area of a <br> triangle? | Multiply the length by the breadth <br> then divide by 2 |
| What units would you use for area? | Square centimetres, $\mathrm{cm}^{2}$, or square <br> metres - $\mathrm{m}^{2}$ |
| How do you calculate the volume of <br> a cuboid? | Multiply the length by the breadth <br> by the height |
| What units would you use for <br> volume? | cubic centimetres, $\mathrm{cm}^{3}$ |

## Patterns and Relationships

| Question | Answer |
| :--- | :--- |
| What is the rule for this sequence <br> $3,5,7, \ldots ?$ | Add on 2 |
| What is the next number in the <br> sequence $3,5,7, \ldots ?$ | 9 |
| What is the rule for this sequence <br> $2,5,8 \ldots ?$ | Add on 3 |
| What is the next number in the <br> sequence $2,5,8$ <br> ...? | 11 |
| What is a square number? | Multiplying a number by itself <br> makes a square number |
| What is the sequence of numbers <br> $1,3,6,10,15, \ldots$ <br> known as? | Triangular numbers |

## Expressions and Equations

| Question | Answer |
| :--- | :--- |
| What number replaces the letter <br> $x ?$ <br> $3+x=8$ | 5 |
| What number replaces the letter <br> $x ?$ <br> $x+2=9$ | 7 |
| What number replaces the letter <br> $b ?$ <br> $3 \times b=12$ | 4 |
| What number replaces the letter <br> $e ?$ <br> $e \times 4=8$ | 2 |
| If $n=3$, what is $n+4 ?$ <br> ? | $3+4=7$ |
| If $n=3$, what is $n \times 4 ?$ |  |
| What number replaces the letter <br> $n ?$ <br> $\frac{n}{4}=3$ | 12 |

## Properties of 2D Shapes and 3D Objects

| Question | Answer |
| :--- | :--- |
| What do you call a triangle with 3 <br> sides the same length? | Equilateral |
| What do you call a triangle with 2 <br> sides the same length? | Isosceles |
| What do you call a triangle with all <br> the sides the different lengths? | Scalene |
| What is a quadrilateral? | A shape with 4 sides |
| Name different quadrilaterals | Square, rectangle, parallelogram, <br> rhombus, trapezium, kite, delta |
| What is the name of the line which <br> passes through the centre of the <br> circle? | Diameter |
| What is the name of the line which <br> is the distance from the centre of <br> a circle to the outside? | Radius |
| What is the name of the perimeter <br> of a circle? | Circumference |
| How does the radius compare to <br> the diameter? | The radius is half the length of the <br> diameter |

| Question | Answer |
| :--- | :--- |
| What is the name of this solid? | Cube |
| What is the name of this solid? | Cuboid |
| What is the name of this solid? | Triangular prism |
| What is the name of this solid? | Tetrahedron |
| What is the name of this solid? | Sphere |
| What is the name of this solid? | Hemisphere |
| What is the name of this solid? | Square based pyramid |

## Angle, Symmetry and Transformation

| Question | Answer |
| :--- | :--- |
| What do you call 2 straight lines <br> which never meet? | Parallel lines |
| How many degrees are in a right <br> angle? | $90^{\circ}$ |
| How many degrees are in a straight <br> angle? | $180^{\circ}$ |
| What is the type of angle which is <br> less than $90^{\circ}$ ? | Acute |
| What is the type of the angle <br> which is between $90^{\circ}$ and $180^{\circ} ?$ | Obtuse $^{\text {? }}$ |

| Question | Answer |
| :--- | :--- |
| How do you would out the real-size <br> of an object if the scale is $1: 200$ | Multiply the image by 200 |
| On a map the scale is $1: 200$. If the <br> length of an object is 3 cm on the <br> map, how long is it in real-life | $3 \times 200=600 \mathrm{~cm}$ |
| On a Cartesian grid what is the <br> name of the horizontal axis? | x-axis |
| On a Cartesian grid what is the <br> name of the vertical axis? | y-axis |
| What is the point where the axis <br> met named? | Origin |
| In a coordinate point which number <br> is written first? | $x$-coordinate |
| If one side of a 2D shape fits <br> exactly over the other half what is <br> this called? | Symmetry |
| What is the name of the mirror <br> line? | Line of symmetry or axis of <br> reflection |
| How many lines of symmetry does <br> as square have? | Which capital letters have 1 line of <br> symmetry? |
| A C D E M T U V W O have 2 lines of symmetry) |  |

## Data and Analysis

| Question | Answer |
| :--- | :--- |
| What is word do you use to mean <br> the number of times something <br> happens? | Frequency |
| What type of chart uses symbols <br> or pictures to show the frequency? | Pictograph |
| What type of chart is this? | Bar chart |
| What type of chart is this? | Line Graph |
| What type of chart is this? | Pie chart |
| How do you show 5 on a tally chart | Make 4 strokes and cross through. <br> What type of chart is this? |

## Probability and Chance

| Question | Answer |
| :--- | :--- |
| What does "impossible" mean? | Something will definitely not <br> happen |
| What does "certain" mean? | Something will definitely happen |
| What is the probability you will <br> watch TV tonight? | "Likely" |
| What is the probability you will win <br> the lottery? | "Unlikely" |
| What is the probability you will <br> throw a six on a dice? | $\frac{1}{6}$ |
| What is the probability you will get <br> a "head" when tossing a coin? | $\frac{1}{2}$ |
